

**14 December 2005**

**To Whom It May Concern:**

In Feb 2004 Andrew Cliffe, the principal of the World is Round was engaged to provide Fuji Xerox Australia (FXA) with a space requirement analysis for an upgrade to our combined Showcase and Technical Support Centre at the Australian Technology Park, Eveleigh NSW.

As a result of this work, FXA obtained a lease for 700m2 of space adjoining the existing facility, to accommodate a relocated and expanded Technical Support Centre. Andrew was engaged to provide the design for the fit-out of the new space.

Andrew has an easy style and worked well with the FXA team in the development of the design concept and the ongoing translation into a finished product. He is an innovative designer who is committed to providing both quality practical and aesthetic solutions.

The new facility has been in use for over twelve months and has proved to be a very usable and flexible space. It fits in well visually with the existing facility at the same time as having a distinctive striking look of its own.

I am pleased to have worked with Andrew and recommend him as a highly professional designer.

Yours sincerely

**Michael Wilson**  
**Customer Service Organisation Business Manager**
